

PRODUCT REQUIREMENT DOCUMENT (PRD)

SRA TruthGuard — National Media & Deepfake Verification Engine

1. Executive Summary

SRA TruthGuard is an AI-powered media literacy and real-time truth verification engine designed to counter online misinformation, fake news, viral social media claims, and AI-generated deepfakes in India.

2. Product Objectives

- Real-Time Monitored News Stream: Aggregates top headlines from verified media channels.
- PIB Record Cross-Verification: Cross-references claims against official Press Information Bureau records.
- SRA DeepCheck AI Verifier: Multi-modal verification analysis for Videos, Documents, and Web URLs.
- Public & Staff Access Roles: User verification portal with restricted Staff/Admin access.

3. Functional Requirements

- FR-1 Authentication & Security: Email/Password registration, Staff ID login, session persistence.
- FR-2 Monitored Stream & Filters: Category tags (Channels, Papers, Radio, Social, Int), Search by title/source.
- FR-3 SRA DeepCheck Engine: Deepfake Video, Document OCR, and Web URL checks with live processing status logs.
- FR-4 Admin Control Panel: Live stats, user table, query tickets queue, staff security credentials.
